EDUCATION

University Of Waterloo

Waterloo, ON

Honours Bachelors of Computer Science

April 2028

- Recipient of the **President's Scholarship of Distinction**, awarded for exceptional academic achievement.
- Pursuing a specialization in **Artificial Intelligence** and a minor in Entrepreneurship.
- Coursework: Object Oriented Programming(OOP), Elementary Algorithm Design and Data Abstraction, Tools and Techniques for Software Development, Computer Organization and design, Statistics, Linear Algebra

EXPERIENCE

Incoming Full Stack Software Engineering Co-op (Upcoming)

May 2026

Carta Maple | React, TypeScript, Python, Django, gRPC, Java, Spring, Docker, Kubernetes, Helm

Kitchener

- Selected for a winter'26 co-op, will design scalable employee workflow UI's using React + TypeScript and build backend APIs in Python/Django, Java/Spring.
- Will integrate gRPC service contracts and participate in deploying containerized microservices with Docker, Kubernetes, and Helm in a cloud-native environment.

Associate Conversation Design Intern

Aug 2025

Cresta (Series D AI Startup, Remote) | Python, SQL, Dialogflow, Pandas, LLMs

CA, Remote

- Built an **LLM-powered redaction auditor** that processed thousands of conversation logs, flagging policy violations with **98% faster QA throughput**.
- Developed automation pipelines for conversation monitoring data using **Python (Pandas, Regex, Google Apps Script)** to generate analytics-ready datasets for analysts.
- Collaborated with cross-functional teams to design scalable conversation workflow models, enhancing data quality and discoverability across 12 enterprise deployments.

Software Engineer & Founding Member

Aug 2024

G12Uni — Startup Platform for Students | ReactJS, Python, GCP, PostgreSQL

Waterloo, ON

- Designed and launched a platform connecting **1,500+ university students across 10+ countries**, focusing on real-time data synchronization and analytics.
- Engineered backend microservices with **Python + PostgreSQL**, implementing API ingestion pipelines (Google Meet, Maps, Chat) and structured data models for dashboards.
- Deployed scalable NLP models on **Docker + GCP**, integrating structured logs into analytics systems to support continuous delivery of AI features.

PROJECTS

PolyScale — Distributed AI Code Search | Go, Python, FastAPI, gRPC, Docker, Docker Compose

Sep 2025

- Built a distributed microservices code search platform, integrating scalable REST/gRPC APIs, in-memory vector search, and rapid orchestration with Docker Compose for production deployment.

Clash Royale Analytics Platform | Python, dbt, PostgreSQL, FastAPI, scikit-learn, Docker

Oct 2025

- Engineered a full data analytics and ML prediction platform, automating ingestion, transformation, and live dashboarding for 50k+ esports battle logs; deployed CI/CD and containerized for scalability.

marketSim | OCaml, Next.js, Python, React, Rust, WebSocket

Sep 2025

- Developed a high-performance, full-stack market simulation engine featuring a deterministic OCaml backend, Rust performance modules, and a React dashboard for interactive trading with real-time data.

Global Equity Simulator | React, TypeScript, Django, Spring Boot, Java, Docker, Kubernetes, Helm

Oct 2025

- Designed an enterprise-grade investment simulation app using React/TypeScript frontend and Django/Spring Boot microservices, fully containerized and orchestrated in a cloud-native environment with Kubernetes and Helm.

SUMMARY

Languages: Python, JavaScript, TypeScript, Java, Go, C++, OCaml, Rust, SQL, PostgreSQL, HTML, CSS

Frameworks & Technologies: ReactJS, Next.js, Django, Spring Boot, FastAPI, dbt, NodeJS, Express, Docker, Kubernetes, Helm, GCP, Firebase, Supabase, Bash, Linux

Developer Tools: Git, GitHub, Bash, Valgrind, GDB, CI/CD pipelines

AI/ML & Data Science: TensorFlow, scikit-learn, Hugging Face, Pandas, NumPy, Matplotlib, Data Engineering, ML Model Integration (XGBoost, Wav2Vec2, Llama2), Parquet/Arrow serialization
